

SECURITY INCIDENT INVESTIGATION REPORT

System: AI-Driven Adaptive Endpoint Behavioral Threat Detection System
Generated: 2026-10-06 08:48:33 UTC

Incident ID	INC-6BAF3A	Severity Tier	Critical
Timestamp	2026-10-06T08:48:33.028891	Status	Open
Root Process	powershell.exe	Process ID (PID)	5824

HYBRID RISK FUSION SCORE BREAKDOWN

Total Risk Score	ML Score (IsoForest)	Rule Score	Process Graph	Attack Sequence
91.2 / 100	71.4 / 100	100.0 / 100	98.0 / 100	95.0 / 100

MITRE ATT&CK; FRAMEWORK ALIGNMENT

Technique ID	Name	Tactic Classification
T1059.001	Command and Scripting Interpreter: PowerShell	Execution
T1071.001	Application Layer Protocol: Web Protocols	Command and Control
T1082	System Information Discovery	Discovery
T1204.002	User Execution: Malicious File	Execution
T1547.001	Boot or Logon Autostart: Registry Run Keys	Persistence

DETECTION RATIONALE & FORENSIC EXPLAINABILITY

Office Spawning Script Host | Obfuscated / Encoded PowerShell | System Discovery Profiling | System Discovery Profiling | Script Interpreter Outbound Connection | Suspicious Autostart Registry Modification | Anomalous process ancestry graph structure (score: 98.0) | Multi-stage temporal attack kill-chain progression (score: 95.0) | Statistical behavioral anomaly in observation window (score: 71.4)

RECOMMENDED ACTIONS & CONTAINMENT AUDIT LOG

Recommended: 1. Isolate endpoint from network adapter. 2. Terminate malicious process tree. 3. Quarantine dropped binaries in Temp. 4. Revert autostart Registry Run keys.

Simulation Audit:
Pending response simulation review.
